

TREADMASTER

ATLANTEAK 2.0

NOTHING LIKE THE TEST OF TIME TO DEMONSTRATE PERFORMANCE

Treadmaster's Atlanteak 2.0 provides the look of teak with renowned anti-slip qualities at a fraction of the price. Manufactured from Thermoplastic, the two layers are fused together to provide an extremely resilient and natural looking product that requires no specialist sealant or varnish to maintain its appearance.

BENEFITS OF ATLANTEAK 2.0

Can be machined to any design, logos and boat names can be engraved

Not effected by light amplification burning on large/moored boats

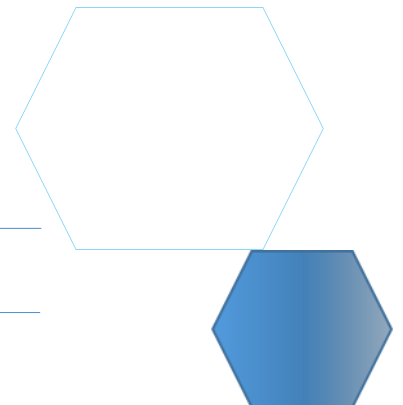

Marine grade PSA for easy DIY installation, can be glued for commercial or over chequer plate floors.

Also available in single colour anti-slip profiles

Low maintenance, can be safely pressure washed

Can be used internally or externally

Available in Teak/Black, Teak/White and Steel/Black
