

SeaDek®

ALL HANDS ON DECK FOR DIY SEADEK

SeaDek Non-Skid closed cell EVA material offers a safe and comfortable alternative for your boat flooring needs.

With a peel and stick application that makes it easy for DIY installations.

Made from a special UV stabilised foam blend designed to handle the tough conditions of life on the water

Its closed cell and non-absorbent, so it won't soak up water, and stands up well to sun, salt, and heat, helping to prevent fading, cracking over time, making it ideal for marine use. While SeaDek is built to last, it's not indestructible. Sharp tools, heavy impacts, or harsh chemicals can still cause damage. With the right care though, SeaDek will keep your trailer boat looking great and performing well for years to come.

BENEFITS OF SEADEK

Exceptional traction when wet or dry

Unparalleled comfort and cool underfoot

Shock absorbent

Protects against scratches, chips & dents

Highly stain resistant

Easily cut by hand with sharp blade

Self adhesive backing for easy installation

Increases the value of your boat
